DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Allowable Subject Matter

3. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, the prior art of record neither shows nor suggest an electrode apparatus comprised of, in part, wherein a dielectric, which constitutes the electrically insulating layer, is a resin composition which includes, at least a low Tg resin having a glass transition temperature equal to or lower than 25 degrees C, and a high Tg resin having a higher glass transition temperature than that of the low Tg resin.

Due to their dependency, claims 2-8 are necessarily allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2879

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,887,967 and US 5,224,265 disclose the state of the art for electrically insulating dielectric layers.

This application is in condition for allowance except for the following formal matters:

Please refer to the above Action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
